#### **Products - Denso**

The Denso HP2 system uses a single internal eccentric cam and two pumping chambers. The two pumping chamber's pistons are set at 90° to each other so that they are on opposite strokes but are operated by the same cam. The amount of fuel entering the chamber is controlled by how long the SCV is open during the intake stroke.

modern high pressure common rail, fuel systems on diesel engines evolved a great deal over the last century. The advanced fuel injection technologies used on today's diesel engines operate at extremely high pressure with very tight tolerances; only genuine components, tested and certified to OE specifications, can ensure long-lasting performance.
