Essilor - Optical Equipment Store

In the Kappa Edger, probes map the contours of both surfaces to determine lens curve, edge thickness and to calculate ideal bevel or groove placement. Upon completion of lens mapping, a 3D representation of the finished bevel or groove is shown on the screen, allowing the user to view its position.

Essilor Kappa Patternless Edger (Pre-Owned) | Enhanced ...

The Kappa edges glass, CR39, hi-index and polycarbonate lenses. An optional polishing wheel can produce a polished lens edge. The system operates with a direct water hookup or a recirculating pump. Wheel maintenance is automatic, reducing operator skill level. Using a cleaning disk, Kappa controls the timing and pressure for consistent results.
