TECHNICAL HANDBOOK ON PRESSURIZED IRRIGATION TECHNIQUES

Drip irrigation is an ideal solution for irregular or small areas. Inline drip irrigation limits the potential for liability by reducing or eliminating overspray on buildings, walkways, roadways, and other trafficked areas. Main-tenance costs are often lower due to reduced overspray, runoff, erosion, compaction, water staining, and property damage.

DRIP IRRIGATION DESIGN & INSTALLATION GUIDE

Micro / Drip irrigation is the term used to describe the method of irrigation which is characterised by the following features : 1. Water is applied at a low rate. 2. Water is applied over a long period of time. 3. Water is applied at frequent intervals. 4. Water is applied via a low pressure delivery system.
