A medical eye examination includes a number of tests and procedures to evaluate the health of your eyes. These tests range from simple ones, like having you read an eye chart, to complex tests, such as using high-powered lenses to examine the inside of your eyes.

### **Medical Eye Examinations**

An eye examination is a series of tests performed to assess vision and ability to focus on and discern objects. It also includes other tests and examinations pertaining to the eyes. Eye examinations are primarily performed by an optometrist, ophthalmologist, orthoptist, or an optician. Health care professionals often recommend that all people should have periodic and thorough eye examinations as ...

### **Eye examination - Wikipedia**

Sit opposite the patient, about a metre apart. Ask the patient to cover one eye and cover your contralateral eye (so that, effectively, your covered eyes are opposite to each other). Hold your arm out so that your hand is equidistant between you and the patient and place in one of the four quadrants.
