The treatment process takes place in a wastewater treatment plant (WWTP), often referred to as a Water Resource Recovery Facility (WRRF) or a Sewage Treatment Plant (STP). Pollutants in municipal wastewater (households and small industries) are removed or broken down. The treatment of wastewater is part of the overarching field of sanitation.

Wastewater treatment - Wikipedia

Some facilities discharge wastewater at concentrations far above (i.e., stronger than) typical residential wastewater. If the systems receiving this wastewater are sized using assumptions valid for residential-strength wastewater, substantial performance problems and premature system failures are likely soon to follow.
